

Strategic Management

Portfolio roadmaps linking operations to business KPIs—uptime protected.

Long-Term Partnerships

Clients stay with us for 5+ years; we scale as an embedded partner.

Global Blended Team

Follow-the-sun support; senior engineers with Niagara/BACnet/Modbus fluency. We work hand-in-hand with your tech/dev teams.

Proven at Scale

10,000+ assets across utilities, campuses, enterprises; documented ROI.

Map Your Portfolio's Hidden Savings

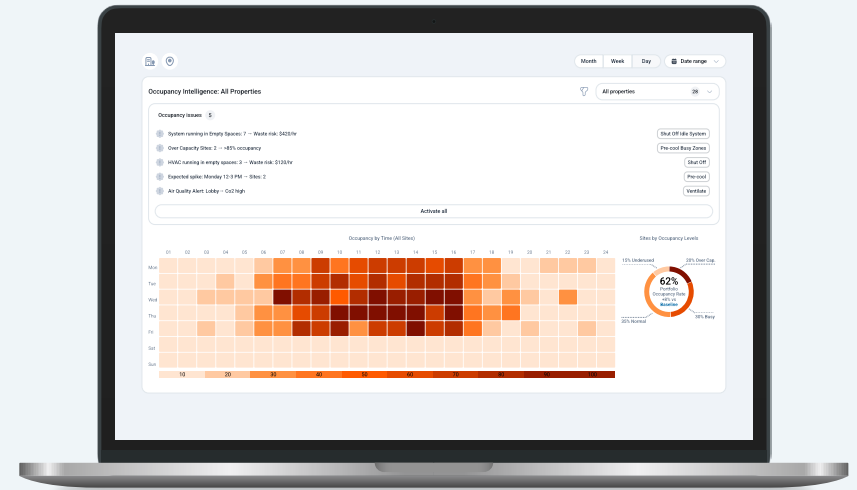

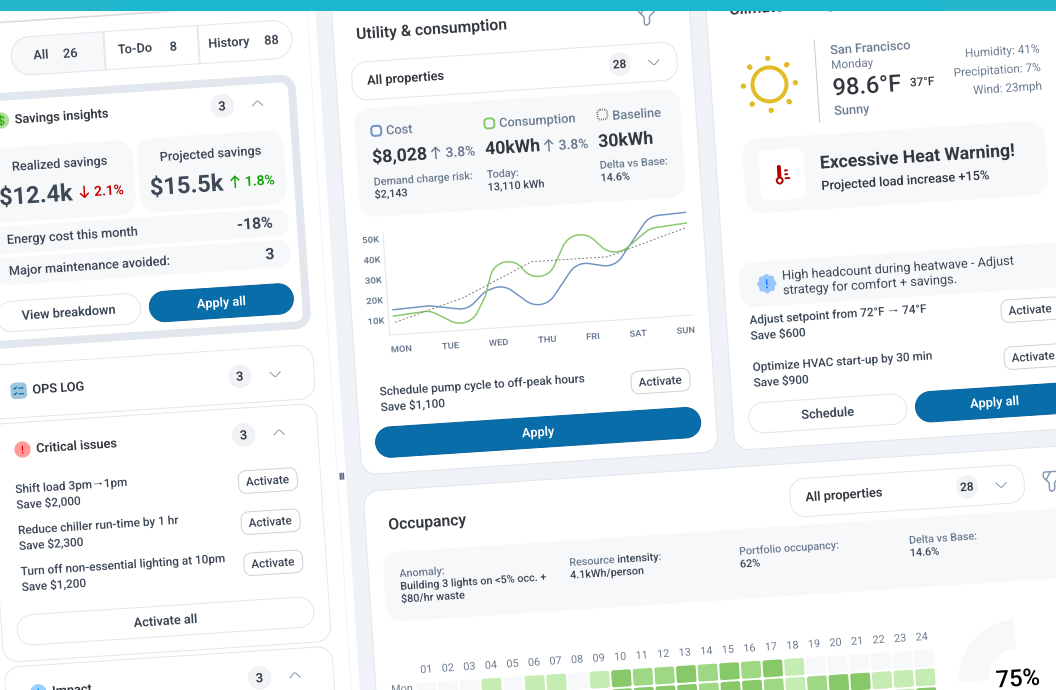

Identify tariff risks, off-hours waste, and ROI pilots—with safety and efficiency guardrails.

IM★REPUBLIC

Cut Costs. Improve Efficiency. Scale Safely.

20+ years integrating BAS, EMS, and utility data—delivering ROI while keeping operations online.

We've built multi-source integration layers—IoT, climate, property—plus AI when it adds real value. Always proof of capability, never hype.

Peckham (IoT/Supply Chain ROI)

Rebuilt a heavy edge stack into a lightweight, secure, and resilient system.

Results: projected \$153K-\$197K annual savings, ROI 70-97%, break-even in 12-15 months.

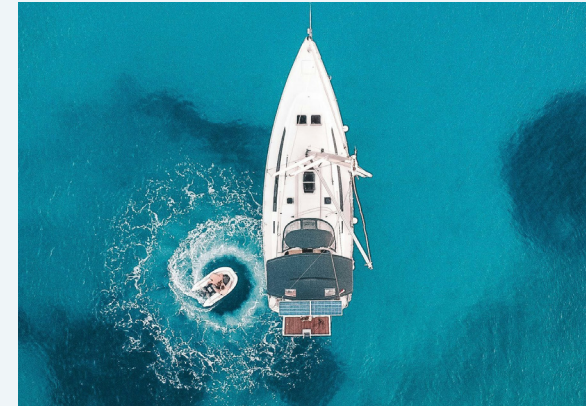

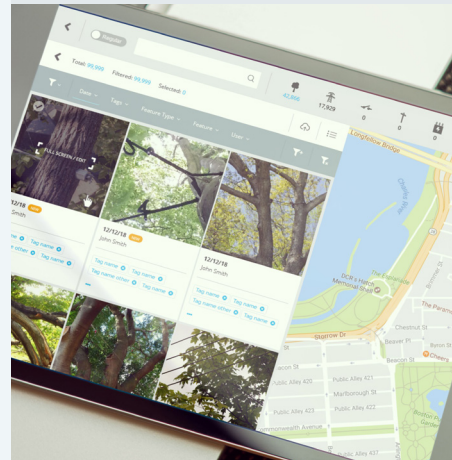

NV5 Facility Management (GIS/Asset Ops)

Web + mobile platform with two-way sync delivered instant updates to field techs and live oversight to managers. Admins assigned work via web console; field iPad app synced completions. Result: reduced truck rolls, eliminated manual reporting, and 10,000+ tracked assets—integrated with existing operations systems.

NV5 Vegetation Management (GIS/Field Ops)

Web console + iPad field app with bi-directional sync and admin workflows for work assignment/status tracking. Streamlined field operations, improved compliance, reduced outage risk.

Blue Forests (Sustainability/ESG)

Drone, satellite, and GIS monitoring detected 30,000+ anchors, generating enforceable evidence.

Fines funded restoration, making protection self-sustaining and aligning ESG compliance with measurable ROI.
